Dear Ms. Severson:

You had asked for an MSDS for our calibration kit part number 812003. This kit is a set of hardware in a carrying case and does not require an MSDS. The kit has room for compressed gas cylinders, supplied separately, which do require an MSDS. If you provide us with the part numbers of the cylinders, we will be happy to provide you with the MSDS.

We have a "Fax Back" service known as QuickLitSM, if you would like to get the MSDS directly. The number to call to access this service is 1-800-672-9010. By following the prompts you can get a comprehensive list of MSDS's which can then be ordered individually. Literature on many of the products supplied by MSA is also available.

I am including a bulletin regarding our recycling program for calibration cylinders. This recycling program allows you to conveniently recycle used cylinders in an environmentally friendly manner.

Please let me know if you need additional information.

Sincerely,

Stephen R. Bayer
