### 2. COMPOSITION/INFORMATION ON INGREDIENTS

<u>INGREDIENT NAME</u> <u>CAS NUMBER</u> <u>WEIGHT %</u>

trichlorotrifluoroethane

Trace impurities and additional material names not listed above may also appear in Section 15 toward the end of the MSDS. These materials may be listed for local "Right-To-Know" compliance and for other reasons.

### 3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: Colorless, volatile liquid with ethereal and faint sweetish odor. Non-flammable material. Overexposure may cause dizziness and loss of concentration. At higher levels, CNS depression and cardiac arrhythmia may result from exposure. Vapors displace air and can cause asphyxiation in confined spaces. At high temperatures (>250°C), decomposition products may include Hydrochloric Acid (HCl), Hydrofluoric Acid (HF) and carbonyl halides, such as phosgene.

### POTENTIAL HEALTH HAZARDS

**SKIN:** Prolonged and/or repeated contact can cause irritation of the skin (defatting of skin).

**EYES:** Irritant. Liquid contact will irritate and may cause conjunctivitis.

**INHALATION:** Overexposure to vapor may cause dizziness, loss of concentration and irritation. With high exposure

levels, effects can include central nervous system (CNS) depression (intoxication) and cardiac arrhythmia. Product vapors displace air and can cause suffocation especially in a confined space.

**INGESTION:** Discomfort due to volatility would be expected. Some of the inhalation effects could be expected.

**DELAYED EFFECTS:** None identified.

### 4. FIRST AID MEASURES

**SKIN:** Promptly flush skin with water until all chemical is removed. Remove clothing contaminated with liquid and wash

before reuse.

EYES: Immediately flush eyes with large amounts of water for at least 15 minutes, lifting eyelids occasionally to facilitate

irrigation. Get medical attention.

**INHALATION:** Immediately remove patient to fresh air. If breathing has stopped, give artificial respiration. Use

oxygen as required, provided a qualified operator is available. DO NOT give epinephrine (adrenaline). Get

medical attention immediately.

**INGESTION:** DO NOT induce vomiting unless instructed to do so by a physician. DO NOT give stimulants. Get medical

attention immediately.

**ADVICE TO PHYSICIAN:** Because of possible disturbances of cardiac rhythm, catecholamine drugs such as epinephrine,

should be used with special caution and only in situations of emergency life support. Treatment of overexposure should be directed at the control of symptoms and the clinical

conditions.

### 5. FIRE FIGHTING MEASURES

### FLAMMABLE PROPERTIES

FLASH POINT: None

FLASH POINT METHOD: ASTM D-1310-67 and ASTM D-56-82

**AUTOIGNITION TEMPERATURE:** 770°C **UPPER FLAME LIMIT (volume % in air):** None **LOWER FLAME LIMIT (volume % in air):** None

FLAME PROPAGATION RATE (solids): Not applicable

OSHA FLAMMABILITY CLASS: Not applicable

### **EXTINGUISHING MEDIA:**

Use any standard agent - choose the one most appropriate for type of surrounding fire (material itself in not flammable)

### **UNUSUAL FIRE AND EXPLOSION HAZARDS:**

Product will decompose at temperatures above 250°C. Decomposition products include hydrochloric acid, hydrofluoric acid, and carbonyl halides, such as phosgene. Contact with certain finely divided metals may cause exothermic reaction and/or explosive combinations. Vapors, when present in the flammable range (listed above), especially in a confined or poorly ventilated space, can be ignited with a flame or high intensity source of heat.

MSDS Number: GTRN-0027 Page 2 of 7

Genetron® 113

### SPECIAL FIRE FIGHTING PRECAUTIONS/INSTRUCTIONS:

Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

### ACCIDENTAL RELEASE MEASURES

#### IN CASE OF SPILL OR OTHER RELEASE:

(Always wear recommended personal protective equipment.) Immediately evacuate the area and provide maximum ventilation. Try to eliminate all ignition sources. Unprotected personnel should move upwind from spill. Only personnel equipped with proper respiratory and eye/skin protection should be permitted in the area. Dike area to contain the spill. Take precautions as necessary to prevent contamination of ground and surface waters. For large spills, pump solvent into appropriate containers. For small spills, recover or absorb spilled material using an absorbant designed for chemical spills such as Hazsorb® pillows. Place used absorbants into closed DOT approved containers for disposal. After all visible traces have been removed, thoroughly wet vacuum the area. DO NOT flush into sewer. If the area of the spill is porous, removal of contaminated earth/surface may be required.

Spills and releases may have to be reported to Federal and/or local authorities. See Section 15 regarding reporting requirements.

### HANDLING AND STORAGE

### **NORMAL HANDLING:**

(Always wear recommended personal protective equipment.)

Genetron 113 boils at 117.7°F, hence contents may be under pressure. Exercise caution when opening container. If containers have been stored in direct sunlight or heated above the boiling point of the solvent, the container should be cooled to below the boiling point before opening.

### STORAGE RECOMMENDATIONS:

Keep container closed when not in use. DO NOT store in open, unlabeled or mislabeled containers. Store in a cool, wellventilated area of low fire risk. Protect container and its fittings from physical damage. Storage in subsurface locations should be avoided. Close valve tightly and repalce bung after use and when empty. If container temperature exceeds boiling point, cool the container before opening.

### **EXPOSURE CONTROLS/PERSONAL PROTECTION**

### **ENGINEERING CONTROLS:**

Use local exhaust at filling zones and where leakage is probable. Use mechanical (general) ventilation for storage areas. All ventilation should be designed in accordance with OSHA standard (29 CFR 1910.94).

### PERSONAL PROTECTIVE EQUIPMENT

### **SKIN PROTECTION:**

Use protective gloves such as MYLAR® coated Durafab, PVA or neoprene. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.

### **EYE PROTECTION:**

For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

MSDS Number: GTRN-0027 Page 3 of 7

Genetron® 113

### RESPIRATORY PROTECTION:

None required for normal work situations where adequate ventilation is provided. Use NIOSH approved self-contained, positive pressure respirators for emergencies and in situations where air may be displaced by vapors.

### ADDITIONAL RECOMMENDATIONS:

High dose-level warning signs are recommended for areas of principle exposure. Provide eyewash stations and quick drench shower facilities at convenient locations. For tank cleaning operations, see OSHA regulations, 29 CFR 1910.132 and 29 CFR 1910.133.

### 10. STABILITY AND REACTIVITY

### NORMALLY STABLE? (CONDITIONS TO AVOID):

Product is normally stable.

Avoid sources of ignition such as sparks, hot spots, welding flames and lighted cigarettes. At all concentration ranges, exposure of the product to high energy sources may yield toxic and/or corrosive decomposition products. After Genetron 113 has been exposed to lubricating oils, alcohols, polyols or other hydrocarbons at temperatures in excess of 100°F, the composition should be monitored for reaction products, particularly R-133a. Reaction products may be toxic.
